

TraxPrint

Secure Document Emailer

Secure Document Emailer

Send email with document

Option 1

Open Trax Dashboard

Load Document

Enter customer email

Encrypt Document

Email sent with special Trax

Print link

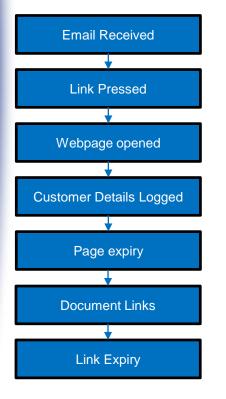

Email document to Trax
Print Email Loader facility

Encrypt Document

System sends customer the special Trax Print link

Option 2

Retrieve document

One time special Trax Print Code link included on the email

After the link is pressed it expires so it cant be accessed again

A special Trax Code will be displayed. The customer scans the code with their Trax Print App and PIN

The IP and if Location services are being shared their GPS is logged and sent back to the sender

After a 5 minute period the page is locked and requires a new scan login with the Trax Print app and PIN

All document links are displayed. When pressed the document is decrypted and displayed in new windows

Once a document is displayed the link is expired to prevent copies of the link being sent to other people
