# Trax✓Print

## Private

Trax✓Print

# No personal information shared with a 3<sup>rd</sup> party

Easily validate a documents contents without having to pass on personal information to any third party

## Trax Print Private works differently

After the Trax code is scanned the app will request information from the document.

When the information is submitted the details are validated and a 'YES' or 'NO' response is given to the person scanning.

## Privacy Protection

The physical document needs to be present to scan the Trax code. Therefore a person is unable to phish for information by placing generic details into a webpage.

The document owner receives a notification if scanned, adding security by allowing the owner to report anything suspicious.
