

Trax Print Secure

Trax Print Secure is for specific private and confidential use. The secure platform is completely isolated from the public Trax Print system and designed for confidential internal document transfers

- Government Documents
- Confidential Reports
- Secure Correspondence
- Blueprints
- Sensitive Documents
- Confidential Contracts
- Legal Documents
- Confidential Orders

Trax Print Secure Process

- We place a unique Trax code on the printed or electronic document.
- With the use of Trax Print scanner app on any smartphone you scan the Trax code on the document.
- If the scanner is authorised to view your document a password is requested before it is opened.
- If the password entered is correct the document is viewable on the app and also sent via secure means.

With multi-layer encryption and triple level validation the closed loop Trax Print system has a Top Secret level of security.
